APPLICATIONS OF THE MOS TECHNIQUE: A BIBLIOGRAPHY--No. 2

Gary M. Carter, Joseph R. Bocchieri,
and J. Paul Dallavalle

1. INTRODUCTION

For more than 10 years, the National Weather Service has provided its field forecasters and various other users of weather information with objective weather guidance based on the Model Output Statistics (MOS) technique. Surface wind (direction and speed) for several stations in the eastern United States was the first weather element for which MOS forecasts were provided on an operational basis. This guidance, first issued in 1968, relied primarily on output from the Techniques Development Laboratory's (TDL's) Subsynoptic Advection Model (SAM). Later, probability of precipitation and precipitation type forecasts were added to the SAM guidance package. In 1972, probability of precipitation guidance based on output from the National Meteorological Center's six-layer coarse mesh Primitive Equation (PE) model was provided for many locations throughout the conterminous United States. Later, as indicated in Table 1, many other elements were added, and the Limited-area Fine Mesh (LFM) model became the main source of input for the MOS prediction equations.

Table 1. Approximate month and year of operational implementation for various types of MOS guidance for locations throughout the conterminous United States.

Weather Element	PE-based Guidance	LFM-based Guidance
Probability of Precipitation	January 1972	February 1976
Precipitation Amount	October 1977	October 1977
Precipitation Type	November 1972	February 1976
Snow Amount	--	October 1977
Thunderstorm/Severe Local Storms		
Short-range	--	April 1974
Medium-range	May 1973	April 1978
Maximum/Minimum Temperature	August 1973	February 1976
3-hourly Temperature	--	June 1978
3-hourly Dew Point	--	April 1980
Surface Wind	May 1973	February 1976
Cloud Amount	December 1974	February 1976
Ceiling/Visibility	October 1974	February 1976
Obstructions to Vision	--	April 1980

This bibliography is an attempt to document applications of the MOS technique to weather forecasting. The entries have been arranged by broad categories such as general reference articles and verification reports or according to the type of weather element. No article is referenced more than once. Within each subsection, the entries are arranged in alphabetical order by last name of the (first) author, and for each author, the entries are in chronological order.

F. Wind

1. Aviation/Public Weather Surface Winds

Best, D. L., 1980: Surface wind forecasting using generalized operator Model Output Statistics. TDL Office Note 80-2, National Weather Service, NOAA, U.S. Department of Commerce, 13 pp.

_____, 1975b: MOS surface wind, cloud amount, and 3-category flight weather forecasts. NWS Technical Procedures Bulletin No. 139, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 9 pp.

_____, 1976a: Surface wind forecasts based on Model Output Statistics (MOS)--No. 6. NWS Technical Procedures Bulletin No. 152, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 7 pp.

_____, 1976b: Surface wind forecasts based on Model Output Statistics (MOS)--No. 7. NWS Technical Procedures Bulletin No. 161, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 8 pp.

_____, 1977: The use of Model Output Statistics for predicting surface wind. NWS Technical Procedures Bulletin No. 191, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 14 pp.

_____, 1978: The use of Model Output Statistics for predicting surface wind. NWS Technical Procedures Bulletin No. 229, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 12 pp.

_____, 1979: The use of Model Output Statistics for predicting surface wind. NWS Technical Procedures Bulletin No. 271, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 12 pp.

_____, 1980: The use of Model Output Statistics for predicting surface wind. NWS Technical Procedures Bulletin No. 288, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 13 pp.

_____, 1982: The use of Model Output Statistics for predicting surface wind. NWS Technical Procedures Bulletin No. 316, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 13 pp.

_____, 1983: The use of Model Output Statistics for predicting surface wind. NWS Technical Procedures Bulletin No. 335, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 12 pp.**

Schwartz, B. E., and G. M. Carter, 1982: An evaluation of a modified speed enhancement technique for objective surface wind forecasting. TDL Office Note 82-1, National Weather Service, NOAA, U.S. Department of Commerce, 10 pp.

2. Marine Winds

Barrientos, C. S., 1970: An objective method for forecasting winds over Lake Erie and Lake Ontario. ESSA Technical Memorandum WBTM TDL-34, Environmental Scientific Services Administration, U.S. Department of Commerce, 20 pp.

_____, 1971: An objective method for forecasting winds over Lake Erie and Lake Ontario. Proceedings Fourteenth Conference Great Lakes Research, Toronto, Ontario, Int. Assoc. Great Lakes Res., 401-411.

_____, 1980: MOS wind forecasts over the Great Lakes. NWS Technical Procedures Bulletin No. 286, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 8 pp.

_____, 1981: Coastal wind forecasts for East Coast, West Coast, Gulf Coast, and Chesapeake Bay shore. NWS Technical Procedures Bulletin No. 309, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 15 pp.

_____, 1982: Coastal and offshore wind forecasts along and near the East Coast, West Coast, Gulf Coast, and Chesapeake Bay shore. NWS Technical Procedures Bulletin No. 321, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 14 pp.

_____, 1983a: Coastal and offshore wind forecasts along and near conterminous United States Coast and Alaskan Coast. NWS Technical Procedures Bulletin No. 328, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 14 pp.**

_____, 1983b: MOS wind forecasts over the Great Lakes. NWS Technical Procedures Bulletin No. 330, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 8 pp.

_____, 1983c: MOS wind forecasts over the Great Lakes. NWS Technical Procedures Bulletin No. 332, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 7 pp.**

3. Gusts

Carter, G. M., 1974: A brief study of wind gust factors. TDL Office Note 74-2, National Weather Service, NOAA, U.S. Department of Commerce, 6 pp.

_____, and T. H. Grayson, 1977: Experimental forecasts of convective gust potential. TDL Office Note 77-9, National Weather Service, NOAA, U.S. Department of Commerce, 9 pp.

_____, 1979: Experimental forecasts of convective gust potential--phase II. TDL Office Note 79-10, National Weather Service, NOAA, U.S. Department of Commerce, 14 pp.

Grayson, T. H., G. M. Carter, S. Brown, and A. MacDonald, 1978: Forecasting high-level convection and gusty surface winds--an interactive man-machine experiment. Preprints Conference on Weather Forecasting and Analysis and Aviation Meteorology, Silver Spring, Amer. Meteor. Soc., 313-319.

National Weather Service, 1974: Surface wind gusts. NWS Technical Procedures Bulletin No. 114, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 4 pp.

_____, 1979: Automated forecasts of convective gust potential. NWS Technical Procedures Bulletin No. 264, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 12 pp.**

_____, and H. R. Glahn, 1976: Objective prediction of cloud amount based on Model Output Statistics. Mon. Wea. Rev., 104, 1565-1572.

Crisci, R. L., and F. Lewis, 1973: Automated probability forecasts of ceiling and visibility based on single station data. Final Report No. FAA-RD-73-13 to Federal Aviation Administration, U.S. Department of Transportation. Techniques Development Laboratory, National Weather Service, NOAA, U.S. Department of Commerce, 16 pp.

_____, 1973: Automated ceiling and visibility forecasts: An evaluation of an operational test. Final Report No. FAA-RD-73-182, Phase III, to Federal Aviation Administration, U.S. Department of Transportation. Techniques Development Laboratory, National Weather Service, NOAA, U.S. Department of Commerce, 15 pp.

_____, 1974: A development plan to improve short-range aviation weather forecasts. Preprints Sixth Conference on Aerospace and Aeronautical Meteorology, El Paso, Amer. Meteor. Soc., 14 pp.

_____, 1976: Improving the bias in MOS ceiling and visibility forecasts. TDL Office Note 76-4, National Weather Service, NOAA, U.S. Department of Commerce, 8 pp.

_____, 1978: A plan for improved short-range aviation weather forecasts. Final Report No. FAA-RD-78-73 to Federal Aviation Administration, U.S. Department of Transportation. Techniques Development Laboratory, National Weather Service, NOAA, U.S. Department of Commerce, 38 pp.

Glahn, H. R., and R. A. Allen, 1970: Preliminary results of a program for the automation of terminal forecasts. Proceedings Sixth AWS Technical Exchange Conference, Tech. Rep. 242, Annapolis, U.S. Department of the Air Force, 169-176.

_____, 1973: An objective cloud forecasting system. TDL Office Note 73-1, National Weather Service, NOAA, U.S. Department of Commerce, 3 pp.

_____, 1974: An objective cloud forecasting system. Preprints Fifth Conference on Forecasting and Analysis, St. Louis, Amer. Meteor. Soc., 79-80.

_____, and K. F. Hebenstreit, 1978: Design study for the development and use of Model Output Statistics in automated aviation weather forecasting. Final Report No. AFGL-TR-79-0002 to Air Force Geophysical Laboratory, U.S. Department of the Air Force. Techniques Development Laboratory, National Weather Service, NOAA, U.S. Department of Commerce, 37 pp.

Globokar, F. T., 1974: Computerized ceiling and visibility forecasts. Preprints Fifth Conference on Forecasting and Analysis, St. Louis, Amer. Meteor. Soc., 228-233.

Klein, W. H., and R. L. Crisci, 1974: Objective forecasting of ceiling and visibility. Preprints Sixth Conference on Aerospace and Aeronautical Meteorology, El Paso, Amer. Meteor. Soc., 472-477.

H. Agricultural Applications

1. Specialized Guidance

Carter, G. M., and J. S. Jensenius, Jr., 1977: Experimental rate of pan evaporation forecasts. TDL Office Note 77-13, National Weather Service, NOAA, U.S. Department of Commerce, 10 pp.

Jensenius, J. S., Jr., E. A. Zurndorfer, and G. M. Carter, 1978: Specialized agricultural forecast guidance for Michigan and Indiana. TDL Office Note 78-9, National Weather Service, NOAA, U.S. Department of Commerce, 12 pp.

_____, and G. M. Carter, 1978a: Experimental rate of pan evaporation forecasts--phase II. TDL Office Note 78-10, National Weather Service, NOAA, U.S. Department of Commerce, 13 pp.

_____, and G. M. Carter, 1978b: Ground condensation guidance for Indiana and Michigan. TDL Office Note 78-12, National Weather Service, NOAA, U.S. Department of Commerce, 13 pp.**

_____, and G. M. Carter, 1979a: Automated forecasts of agricultural weather elements. Preprints Fourteenth Conference on Agriculture and Forest Meteorology, Minneapolis, Amer. Meteor. Soc., 42-44.

_____, and G. M. Carter, 1979b: Specialized agricultural weather guidance for South Carolina. TDL Office Note 79-15, National Weather Service, NOAA, U.S. Department of Commerce, 16 pp.**

_____, and V. J. Dagostaro, 1980: Specialized agricultural weather guidance for Kentucky. TDL Office Note 80-5, National Weather Service, NOAA, U.S. Department of Commerce, 8 pp.**

2. Sunshine and Solar Energy

Jensenius, J. S., Jr., and G. F. Cotton, 1981: The development and testing of automated solar energy forecasts based on the Model Output Statistics (MOS) technique. Proceedings First Workshop on Terrestrial Solar Resource Forecasting and on Use of Satellites for Terrestrial Solar Resource Assessment, Washington, Amer. Sect. Int. Solar Energy Soc., 22-29.

_____, 1983: Automated forecasts of daily global solar energy. Preprints Annual Meeting of the Solar Energy Society, Minneapolis, Amer. Solar Energy Soc., 859-864.**

National Weather Service, 1981: Solar energy guidance. NWS Technical Procedures Bulletin No. 304, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 5 pp.

_____, 1982a: Solar energy guidance. NWS Technical Procedures Bulletin No. 313, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 5 pp.

_____, 1983a: Development of an improved automated system for forecasting the probability of frozen precipitation in Alaska. TDL Office Note 83-6, National Weather Service, NOAA, U.S. Department of Commerce, 25 pp.**

_____, 1983b: Development of an improved automated system for forecasting cloud amount, ceiling height, visibility, and obstructions to vision in Alaska. TDL Office Note 83-10, National Weather Service, NOAA, U.S. Department of Commerce, 20 pp.**

National Weather Service, 1977a: Alaskan maximum/minimum temperature and surface wind forecasts, FMAK1 bulletin. NWS Technical Procedures Bulletin No. 192, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 4 pp.

_____, 1977b: Alaskan maximum/minimum temperatures, surface wind, and probability of precipitation, FMAK1 bulletin. NWS Technical Procedures Bulletin No. 202, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 5 pp.

_____, 1977c: Alaskan maximum/minimum temperatures, surface wind, probability of precipitation, and conditional probability of frozen precipitation (PoF), FMAK1 bulletin. NWS Technical Procedures Bulletin No. 208, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 5 pp.

_____, 1979: Alaskan maximum/minimum temperatures, surface wind, probability of precipitation, conditional probability of frozen precipitation, ceiling, visibility, and cloud amount--FMAK1 bulletin. NWS Technical Procedures Bulletin No. 262, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 7 pp.

_____, 1981: The use of Model Output Statistics for predicting probability of nonprecipitating obstructions to vision in Alaska. NWS Technical Procedures Bulletin No. 296, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 6 pp.

_____, 1982: Alaskan temperature, surface wind, probability of precipitation, conditional probability of frozen precipitation, and cloud amount guidance (FMAK1 bulletin). NWS Technical Procedures Bulletin No. 317, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 14 pp.

_____, 1983: Alaskan temperature, surface wind, probability of precipitation, conditional probability of frozen precipitation, and cloud amount guidance (FMAK1 bulletin). NWS Technical Procedures Bulletin No. 329, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 16 pp.**

Schwartz, B. E., 1983: Development of a new automated system for forecasting surface winds in Alaska. TDL Office Note 83-5, National Weather Service, NOAA, U.S. Department of Commerce, 14 pp.**

Lange, A., 1973: Statistical surface wind prediction in Finland. Tech. Rep. No. 6, Finnish Meteorological Institute, Helsinki, Finland, 23 pp.

Langseth, D. E., 1980: Empirical temperature forecasting: Extensions of the Model Output Statistics method. M.S. Dissertation, Massachusetts Institute of Technology, 191 pp.

MacDonald, A. E., 1977: The MAN/MOS program. NOAA Technical Memorandum NWS WR-112, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 21 pp.

Maddox, R. A., and B. E. Heckman, 1982: The impact of mesoscale convective weather systems upon MOS temperature guidance. Preprints Ninth Conference on Weather Forecasting and Analysis, Seattle, Amer. Meteor. Soc., 214-218.

Mass, C., and A. Robock, 1982: The short-term influence of Mount St. Helens volcanic eruption on surface temperature in the northwest United States. Mon. Wea. Rev., 110, 614-622.

Moore, P. L., and D. L. Smith, 1972: Updating of numerical precipitation guidance. NOAA Technical Memorandum NWS SR-64, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 16 pp.

Oster, T. W., 1981: Analysis of temperature forecasts at Milwaukee, Wisconsin, over a one-year period. National Weather Digest, 6, 10-18.

Ouzts, S. O., and R. J. Renard, 1979: Refinement of a statistical diagnostic model of marine fog using FNWC model output parameters. NPS Technical Report 63-79-002, Department of Meteorology, Naval Postgraduate School, 87 pp.

Plankinton, J. C., Jr., 1976: Use of MOS parameters in temperature forecasting. NOAA Technical Memorandum NWS WR-106, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 4 pp.

Quinn, P. F., 1978: Further development of a statistical diagnostic model of marine fog using FNWC model output parameters. M.S. Dissertation, Naval Postgraduate School, 73 pp.

Renard R. J., M. C. Koziara, and W. J. Thompson, 1980: Development of a statistical model to specify marine fog probability using numerically-derived model output parameters. Preprints Eigth Conference on Weather Forecasting and Analysis, Denver, Amer. Meteor. Soc., 13-18.

Ronco, J. A., Jr., 1972: A procedure for improving National Meteorological Center objective precipitation forecasts. NOAA Technical Memorandum NWS ER-49, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 9 pp.

_____, 1973: A procedure for improving National Meteorological Center objective precipitation forecasts--winter season. NOAA Technical Memorandum NWS ER-54, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 8 pp.
